Titles

A

Advanced Method for the Estimation of Reaction Kinetics,Scaleup, and Pressure Relief Design, An... 1
Advantage of the New Version VDI 3673 Part I in Comparison With Chapter 7 of NFPA 68. 45
Anticipated Impact of the EPA's RMP Regulation on the Ammonia Industry, The 215
Applications of ARC™ Thermokinetic Data to the Design of Safety Schemes for Industrial Reactors. . . 71

C

Choosing the Level of Detail for Hazard Identification .218
Conflicts and Decisions in the Search for Inherently Safer Process Operations. .52
Critical Temperatures for the Thermal Explosion of Liquid Organic Peroxides..37

D

Design and Engineering Aspects of Halon Replacements 57
Detonation Flame Arrester Qualifying Application Parameter 139
DIERS Users Group: Status and Current Activities, The 87
Dow's Chemical Exposure Index Guide . .163

E

Emergency Relief Systems (ERS) Design: An Integrated Approach Using DIERS Methodology 93
Expressions for Gravity Drainage of Annular Totoidal Containers 238

H

Hazard Evaluation of Polymerizable Compounds 79
Hazardous Release Protection: Code and Standard Considerations for Pressure Systems 244

I

Ignition Behavior of Dusts: Meaning and Interpretation 107
Inherently Safer Plants: Practical Applications . . 63

M

Method for Implementing a Piping Inspection Program, A 32
Method Used to Estimate Screening-Level Total Failure Probability for Human Error Events 212

O

Oxygen Balance Criterion for Thermal Hazards Assessment, The 29

P

Protection of Storage Tanks from Two-Phase Flow Due to Fire Exposure .183
PSM'S Most Common Struggle:Implementing Mechanical Integrity. . 232

Q

Quantitative Risk Assessment in Europe 229

R

Relative Risk of Pressurized and Refrigerated Storage for Six Chemicals, The 200

S

Simulating Flammability Under Process Conditions. 22
Simulation of an Accidental Vapor Cloud Explosion 173
Some Loss Prevention Case Histories 27
Some Thoughts on the Difference Between Inherent Safety and Safety 227
Successful System Design Through Integrating

Engineering and Human Factors 147

T

Take Chemistry and Physics into Consideration in all Phases of Chemical Plant Design 153
Thermal Ignition Kinetics of Wood Sawdust Measured by a Newly Devised Experimental Technique 266
Transition From Deflagration to Detonation in Layered Dust Explosions 257

V

Valitation of Scaling Techniques for Experimental Vapor Cloud Explosion Investigations 120
Vent Sizing for Fire .... Considerations for ... Special Equipment and Piping 26
Violence of Dust Explosions in Integrated Systems ..131

Subjects

A

Ammonia industry 215
Annular containers 238
ARC™ data 71

C

Chemical
exposure index guide ..163

Statement of Ownership, Management, and Circulation (required by 39 U.S.C. 3685) of September 20, 1995, for *Process Safety Progress* Publication No. 689-410, issued quarterly for an annual subscription price of $185 from 345 E. 47th St.,New York, NY 10017, which is the location of its publication and business offices. The name and address of the Publisher, Editor, and Managing Editor are: Publisher, Stephen R. Smith, 345 E. 47th St., New York, NY 10017; Editor, T.A. Ventrone, 345 E. 47th St. New York, NY 10017; Managing Editor, Maura Mullen, 345 E. 47th St., New York, NY 10017. The owner is: American Institute of Chemical Engineers, 345 E. 47th St., New York, NY 10017. The known bondholders, mortgagees, and other security holders owning or holding one percent or more of the total amount of bonds, mortgages, or other securities are: None. The purpose, function, and nonprofit status of this organization, and the exempt status for federal income tax purpose have not changed during the preceding 12 months. The following figures describe the nature and extent of *Process Safety Progress'* circulation. In each category the first number (*in italics*) is the average number of copies of each issue during the preceding 12 months. The number next to it, within parentheses ( ), is the actual number of copies of the single issue published nearest to the filing date. Total number of copies printed (net press run), *2,855* (2,700). Paid circulation: 1. Sales through dealers and carriers, street vendors, and counter sales: None; 2. Mail subscription, *2,174* (2,145). Total paid circulation *2,174* (2,145). Free distribution by mail carrier, or other means; samples, complimentary, and other free copies, *52* (51). Total distribution *2,226* (2,196). Copies not distributed: 1. Office use, left over, unaccounted, spoiled after printing *629* (504). 2. Returns from news agents: None. Total *2,855* (2,700). I certify that the statements made by me are correct and complete. Stephen R. Smith, Managing Director, Publications.
